

Class Installation Guide for Students and Families

We are now using a new teaching and learning application called **Class**. This guide will walk you through the steps to download and launch the Class application.

STEP 1

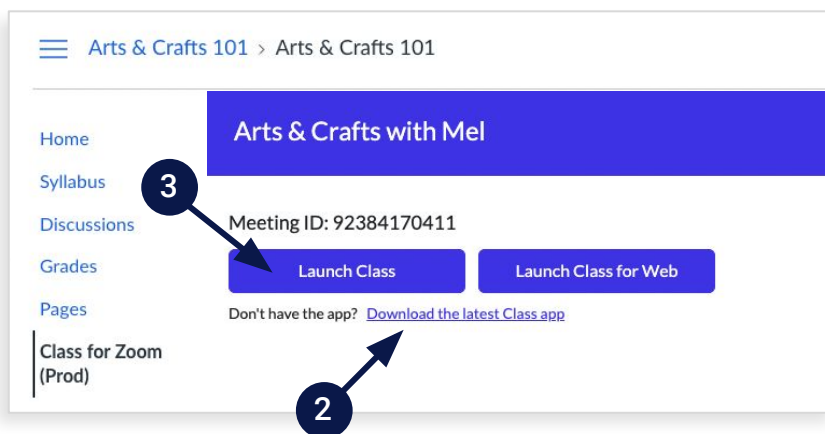

Log in to your Learning Management System (LMS) and find your course

Within your course menu, find and select the Class link (yours may be named something different).

STEP 2

Download the Class application (screenshot below)

If this is your first time using the Class app, you'll have to download the latest version.

Here you can find step-by-step instructions for installing Class:

<https://www.class.com/install-guides/>

STEP 3

Launch Class app from your LMS (screenshot above)

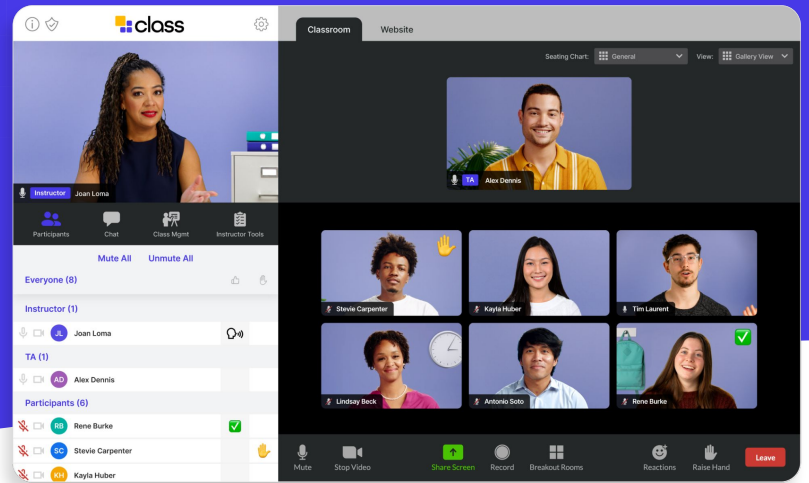

After you've downloaded the application, you'll come back to your LMS and select the "Launch Class" button. This will open the app for you and you will be taken straight to your Class session!

Student guides are available online: <https://www.class.com/learner-guides>

Class Extended Support for Students & Families

All end-users—including **instructors, faculty members, students, or learners**—can call, email or open a case.
